ETHYLENE OXIDE STERILIZER BKM-108

FULLY AUTOMATIC ETHYLENE OXIDE STERILIZER

The fully automatic ethylene oxide sterilizer is controlled by a microcomputer color LCD and is divided into a computer control system, a vacuum sterilization room system, a constant temperature system, and a residual gas treatment system. When in use, you only need to press the run button twice to achieve automatic heating, vacuuming, dosing, humidification, vaporization, sterilization, residue removal, and automatic analysis of the ethylene oxide residue.
In order to make our product more perfect, we have added single tank pure ethylene oxide dosing and mixed ethylene oxide dosing functions on this machine for more convenience and safety, achieving 100% sterilization.
This product has unique advantages in sterilization and disinfection of moisture and heat sensitive items.

SPECIFICATIONS

Model	BKM-108
Inner Gallbladder Capacity	400L
Disinfection Mode	Low temperature
Source	AC220V 50Hz
Inner Liner Size (L x W x H, mm)	1010 x 660 x 600
Outer Box Size (L x W x H, mm)	1160 x 1130 x 1950
Alt Name	Fully Automatic Ethylene Oxide Sterilizer
