Biolab Biological Safety Cabinet Class II Series is engineered specifically for laboratory operations that require user and product protection. Operates with a negative air pressure for personnel protection and HEPA filtered laminar airflow for product protection. Suitable for microbiological and research applications that do not involve radioactive substances and toxic contaminants.

Used in Cell culturing, Genetics, Microbiological, Research, Cell Biology, Molecular Biology, Plant, Laboratory. Also known as Class II BSC, Biosafety Cabinet.

BCBS-1205 BIOLOGICAL SAFETY CABINET CLASS II

Color key display: large screen, more clear and dynamic display of various values of the safety cabinet, and has the function of appointment timing.

Automatically adjust the wind speed

With power-off memory function, the state before power-off will be restored after power-on, and there will be visual prompts and alarms

The integrated design of the operation area makes it easy to disassemble and clean

The cabinet is separated from the base. The height of the adjustable base can be customized

Interlocking function: UV lamp and front window; UV lamp and fan, lamp; fan and front window

It has the function of appointment timing, which can automatically set the time of starting and shutting down the safety cabinet and the running time of ultraviolet lamps, fans and sockets

The front window closes the double trigger signal, so that the sterilization and disinfection function of the ultraviolet lamp is normally turned on.

The negative pressure air duct is equipped with a foreign matter filtering structure to prevent foreign matter such as paper scraps from entering the fan system and affecting the normal operation of the product

The front window glass has a one-key lift function

The one-piece hand resting surface has a larger contact area with the arm and is more comfortable
