

## **AUTOMATIC TISSUE PROCESSOR BHTP-309**

## **AUTOMATIC TISSUE PROCESSOR BHTP-309**

Tissue processor prepares tissue samples for sectioning and microscopic examination by fixing, staining, dehydrating or decalcifying them. It is mostly single unit devices which can accommodate a variety of processing techniques therefore improving the efficiency of tissue processing.

Used in Clinical and Research Histopathology.

Also known as Tissue Embedding Cassettes.

## **BHTP-309 AUTOMATIC TISSUE PROCESSOR**

Prompt judge and automatic processing in case of abnormal condition, which can prevent the tissue from being damaged.

Double-control heat without water. Based on different tissues, several running programs available for customers. With transmission of gear and rack, mechanical failures can be reduced. Several standby programs available.

## **SPECIFICATIONS**

| Model                        | BHTP-309  |
|------------------------------|---|
| Tanks                        | 12 Tanks (3 wax cylinders in the end)           |
| Capacity of single- tanks    | 1000 ml   |
| Basket can hold              | 60 specimens                                    |
| Single tanks processing time | set arbitrarily in the range of 0 to 99 hour(s) |
