

VACUUM DISTILLATION TESTER BPTL-252

VACUUM DISTILLATION TESTER BPTL-252

Petroleum testing is the analysis during upstream, midstream, and downstream production processes of petroleum products. It is most commonly used to test petroleum product, its product components, byproducts of crude oil, fuel, natural gas, upstream oil and gas and other formats of petroleum.

Used in Petroleum Industry, PVC Pipe Industry.

Also known as Vacuum Distillation Apparatus.

BPTL-252 VACUUM DISTILLATION TESTER

The instrument is used to determine the range of boiling points for petroleum products that can be partially or completely vaporized at a maximum liquid temperature of 400°C. The instrument has a built-in 10.1-inch color LCD touch screen industrial control computer, with a friendly man-machine dialogue interface and convenient operation. With built-in condensate trap and semiconductor refrigeration technology, The refrigeration device is compact. The system is equipped with nitrogen interface. After the experiment, the system will prompt the user to open the nitrogen valve to avoid the danger of air entering the vacuum system.

SPECIFICATIONS

| Model | BPTL-252 |
|---|--|
| Temperature control range of condensate circulating water | Ambient+5°C (Min. 30°C) ~80°C±3°C; adjustable |
| Working Mode of condensate trap | Semiconductor refrigeration |
| Minimum temperature | ≤ -40 °C |
| Absolute pressure setting | 2 mmHg, 5 mmHg, 10 mmHg, 20 mmHg, 50 mmHg |
| Absolute pressure measurement range | (2.00-170.00) mmHg ± 0.01 mmHg automatic constant pressure |
| Absolute pressure control accuracy | |
| When residual pressure <1kPa (7.5mmHg) | accuracy <0.01kPa (0.075mmHg) |
| When residual pressure ≥ 1kPa (7.5mmHg) | accuracy ≤ 1% of absolute pressure |
| Ambient temperature | 15°C~35°C |
| Relative humidity | ≤ 85% |
| Total power consumption | ≤1800W |
| Power supply | AC 220V, 50Hz |
| Dimension | 800×500×900 mm |
