# LABORATORY LOW SPEED REFRIGERATED CENTRIFUGE

## BET103

### VERTICAL LOW SPEED REFRIGERATED CENTRIFUGE

- With single-chip microcomputers, self-developed control boards and high-torque variable frequency AC motors, the centrifuge can run stably with lower noise, allowing for a comfortable laboratory environment.
- Imported fluorine-free refrigeration compressor unit and eco-friendly refrigerant R404a, allowing for a wide temperature control range: -20°C to + 40°C (can be set during operation); pre-cooling function (quickly cool down to the set temperature); standby cooling function (maintain the set temperature in the standby state); heating and defrosting function.
- Early warning functions such as overspeed, overheating, imbalance, undervoltage, and overvoltage warnings; three-stage damping shock absorber, a specially combined shock absorbing device to ensure the motor runs smoothly and safely and prevent samples from resuspending, thus securing excellent centrifugal effect.
