# DUAL TEMPERATURE DRY BATH INCUBATOR BFA1BU2

## DUAL TEMPERATURE CONTROL DRY BATH INCUBATOR

Dual temperature control dry bath incubator is a microcomputer controlled constant temperature dry bath device, high temperature control accuracy, good parallelism of sample preparation, to replace the traditional water bath device, can be widely used in sample preservation and reaction, DNA amplification and electrophoresis pre-denaturation, serum coagulation and so on. Application industry throughout the pharmaceutical, chemical, food safety, quality testing, environment and so on.

Unique dual temperature control slot can individually control temperature to make sure noninterference. One equipment to meet the demands for more experiments. OLED display, simple interface, double time and temperature setting, simultaneous temperature and diminishing time display.

Fast heating speed, uniform heating, accurate temperature control, high stability, low energy consumption and no noise.

Built in temperature calibration function, automatic fault detection and buzzer alarm function.

Built in over-temperature protection devices, safe and reliable, enhance the service life of the machine.

Product designed compact and tight, occupied little space. Using freer and easier.
