SEROLOGICAL PIPETTE BFS1BN12 (BPIC-612)

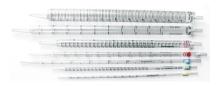

SEROLOGICAL PIPETTE BFS1BN12

SEROLOGICAL PIPETTE

Serological pipettes are designed to be used with electromotion pipette controllers and manual pipette pumps to transfer liquid in various volumes for laboratory use. With high transparency polystyrene and clear graduation, the serological pipettes are easy to read in accurate volume by users. Graduation is printed on the pipette surface to be calibrated on accuracy ±2%. To meet global market needs, pipette tips are crafted to two forms, welding and stretching.

Two types of packaging are available for pipettes: bulk packaging and individually packaging in plastic/paper wrapper. All serological pipettes are packaged with sterilization in bags, RNase-free, DNase-free and Non-pyrogenic.
