

WHEELCHAIR BHBD-1103

WHEELCHAIR BHBD-1103

ELECTRIC LIFT PATIENT TRANSFER WHEELCHAIR

Wheelchair is mainly used as a manually operated or power-driven device designed with double cross-shaped brackets, which enhance the safety of the structure. In the meantime, adjustable armrests, quick disassembly of footrest, positioning of Controller and other functions reflect the user-friendly design, and provide great convenience for the user.

This is a kind of patient lift
it is electric lift
height of sling can be adjustable

SPECIFICATIONS
