

AIR SHOWER BJU-4601

AIR SHOWER BJU-4601

AIR SHOWER

Air shower is a necessary purification equipment, installed between clean room and non-clean room. When people need to enter the clean area, it is necessary to pass through the air shower, and the clean air blown out can remove the dust carried by people, effectively preventing or reducing the entry of dust sources into the clean area. The front and back doors of the air shower are electric interlocked, which can effectively prevent unpurified air from entering the clean area.

SPECIFICATIONS

Model	BJU-4601
External Size(WxDxH)	1300x1000x2050mm
Shower Area Size(WxDxH))	800x900x1930mm
HEPA Filter	99.995% efficiency at 0.3µm
Spraying Wind Speed	25m/s
Air Shower Time	0~99s (adjustable)
Sound Emission	<70dB(A)
No.of SS Nozzles	6
Fluorescent Lamp	12Wx1
Consumption(W)	550
Cabinet Material(Optional)	Full cold-rolled steel with powder coatingInternal stainless steel,external with cold-rolled steelFull Stainless Steel
Door Material(Optional)	Cold-rolled steel with powder coatingStainless Steel
Power Supply	AC220V±10%, 50/60Hz; 110V±10%, 60Hz
Net Weight(kg)	150
Gross Weight(kg)	300
Shipping Size (WxDxH)(mm)	1400x1200x2200
Alt Name	Air Shower
