

## DISPENSING BOOTH BKF-1802

# DISPENSING BOOTH BKF-1802

## NEGATIVE WEIGHING BOOTH

Fully made of stainless steel 304  
Front windows are made of tempered glass  
Equipped with UV lamp in the work area  
With micro-computer interlock to ensure two doors won't open at the same time  
Dynamic pass box equipped with the fan and HEPA filter

## SPECIFICATIONS

|                                      |                                      |
|--------------------------------------|--------------------------------------|
| Model                                | BKF-1802                             |
| Internal Dimensions (W*D*H)          | 1100*900*2100                        |
| External Dimensions (W*D*H)          | 1200*1350*2400                       |
| Cleanliness                          | ISO5(Class100)                       |
| Average wind speed                   | 0.45±20%                             |
| Illuminance                          | ≥300LX                               |
| Noise                                | ≤65dB(A)                             |
| Power supply                         | AC380V, 3φ, 50Hz                     |
| Weight                               | 450Kg                                |
| LED lamp specifications and quantity | 15Wx2                                |
| Material                             | Stainless steel 304, thickness 1.0mm |
| Alt Name                             | Negative Weighing Booth              |

## APPLICATIONS

The weighing booth is a partial purification equipment used in pharmaceutical, microbiological research, and scientific laboratories. It provides a vertical unidirectional airflow, with some clean air circulating in the work area and some discharged to nearby areas, causing negative pressure in the work area and preventing cross contamination. It is used to ensure a high cleanliness environment in the work area.
