

LABORATORY VERTICAL AUTOCLAVE BKK-902

LABORATORY VERTICAL AUTOCLAVE BKK-902

VERTICAL PRESSURE STEAM STERILIZER

Fully stainless steel structure.
Hand wheel type of quick-open door structure.
Door safety lock system.
Automatically controlled by computer.
LCD display of working status, touch type key.
Over temperature & over pressure auto-protection.
The internal steam/water circulation system is equipped with an exhaust cooling system, which avoids the generation of aerosols and does not discharge steam to the outside. Therefore, the working environment is clean and dry.
Self-inflating type seal.
Safe protection of water lacking.
Automatically shut off with a beep reminder after sterilization.

SPECIFICATIONS

Model	BKK-902
Capacity	50L
Sterilization Temperature	134°C
Working Pressure	0.22 Mpa
Features	
Chamber volume	50L Φ 340x550mm
Max. working pressure	0.23Mpa
Heat average	$\pm 1^{\circ}\text{C}$
Timer range	0-99min/0-99hour59min
Temperature adjust range	0-134°C
Power	2x1.5KW/AC220V 50HZ
Overall dimension(mm)	710x465x1150
Transport dimension(mm)	740x490x1130
G.W/ N.W	122Kg/99Kg
Alt Name	Vertical Pressure Steam Sterilizer

FEATURES

Fully stainless steel structure.
Hand wheel type of quick-open door structure.
Door safety lock system.
Automatically controlled by computer.
LCD display of working status, touch type key.
Over temperature & over pressure auto-protection.
The internal steam/water circulation system is equipped with an exhaust cooling system, which avoids the generation of aerosols and does not discharge steam to the outside. Therefore, the working environment is clean and dry.
Self-inflating type seal.
Safe protection of water lacking.
Automatically shut off with a beep reminder after sterilization.
With two stainless steel sterilizing baskets.
A high-efficiency filter is added to the exhaust to ensure the safety of the environment and operators.
Optional drying system.

APPLICATIONS

The vertical pressure steam sterilizers are assembled with a heating system, micro-computer controlled system, over heat and over pressure protection system, which are reliable for the sterilizing effects, convenient for operation and energy conservation. They are suitable for sterilizing equipment, dressings, containers, liquids, culture medium, waste, etc. in hospitals, disease control centers, P2 biological laboratories and blood stations, etc. of scientific research institutes.
